Art Unit: 3724

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 3,4,7,8 and 28, drawn to a razor having male or female electrical couplings.
- II. Claims 9 and 19, drawn to a razor employing seals.
- III. Claims 12 and 13, drawn to a razor having a battery that is rechargeable or replaceable.
- IV. Claims 15,20,26 and 29-38,40, drawn to a razor having a selectable frequency or amplitude of vibration.
- V. Claims 18 and 39, drawn to a razor having a solid-state semiconductor control module.

2. Claims 1,2,5,6,10,11,13,14,16,17,21-25 and 27 will be examined with the elected invention. Claim 1 links the inventions of groups I-V. The restriction requirement of the linked inventions is subject to the nonallowance of the linking claim, claim 1. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is

Art Unit: 3724

withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

3. Inventions of groups I-V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, the razor having male or female electrical couplings as in group I could be employed with exposed parts, as opposed to the sealed parts of group II. Conversely, the razor having seals of group II could be used with a permanent electrical connection, as opposed to the male or female connectors of group I. See MPEP § 806.05(d).

4. There is an excessive burden on the office to examine all of these inventions together, as shown by their search. See MPEP 808.02(C). For example, the razor having male or female electrical couplings of group I would be search in the electrical connection art along with a unique text search. The invention of group II would not be search as above, but instead would be searched in the seal art along with a different text search. The remaining groups also have unique searches.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different search, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth E. Peterson whose telephone number is 703-308-2186. The examiner can normally be reached on Mon-Thur, 7:30-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allan Shoap can be reached on 703-308-1082. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
